

KEY IDEAS ROUND ROBIN

The Changing Magnetic North

Name: _____ Date: _____ Class: _____

MY KEY IDEAS

Over time, runways will start to vary from compass readings.

If a pilot's compass readings are not correct, they could go to the wrong airport.

Magnetic north is currently hovering in the Arctic Ocean.

Magnetic north and true north (the North Pole) are not at the same place.

PARTNER KEY IDEAS

Pilots and sailors depend on accurate compass directions for navigation.

Magnetic north is constantly moving.

GROUP KEY IDEA

For accurate navigation, people must make adjustments to account for an every changing magnetic north.
