

MOVING OIL: ANTICIPATION GUIDE

Name: _____ Date: _____ Class: _____

Before Reading: In the **Before** column mark each statement as **True** or **False**.

During or after reading: In the **After** column mark each statement as **True** or **False** based on the information in **BLM A2: Moving Oil Around the World**. In the space below each statement, write **evidence** that supports the answer to the statement.

Before		Statements	After	
T	F	The transportation of oil by train is necessary as there are not enough pipelines to deliver the amount needed by us at this time.	T	F
T	F	Construction of pipelines creates very little disruption to ecosystems.	T	F
T	F	Tanker ships are the best way to move large volumes of oil.	T	F
T	F	Trucks spill more oil on land than any other method of transporting oil currently used.	T	F
T	F	It is cheaper, on land, to transport oil by train than by pipelines.	T	F

Based on what you have read, what considerations do people need to take into account when comparing methods of transporting oil?

- 1.
- 2.
- 3.
- 4.
